

# MANAGING RISK POLICY

This Board policy is overseen by the Audit and Risk Management Committee.

Nick D'Esposito, Risk, Audit and Fraud Lead is the day to day owner.

Last updated: November 2022

## Why Spark has this policy

Spark's Agile organisation design and practices empowers its people to make decisions to achieve a strong customer focus, speed to market and people engagement.

The managing risk framework co-ordinates different areas to play their part in helping our people identify and manage strategic, operational and external challenges to achieving these shared goals and objectives.

The framework is designed on the principles that managing risk:

- Creates, protects and enhances value;
- Is part of decision-making processes;
- Explicitly addresses uncertainty;
- Is systematic, structured and timely;
- Is transparent and inclusive; and
- Is iterative and responsive to change.

The expected benefits include more business opportunities, reduced performance variability, improved threat resilience and greater risk transparency.

## What this policy says

Spark expects its people to manage the risks associated with achieving their Organisational

Unit's purpose and objectives. The Leadership Squad are expected to manage the risks associated with achieving Spark's strategy and business objectives as approved by the Board.

To help them to do this, Spark has chosen a leading Enterprise Risk Management framework: COSO ERM: 2017.

This framework has five inter-related components:

- Governance and culture;
- Strategy and objective setting;
- Performance;
- Review and revision; and
- Communication and reporting.

These five domains are embedded in Spark's Managing Risk Framework and ensure the Three Lines of Defence Risk Model (1. Own and manage 2. Monitor and 3. Provide independent assurance) is utilised.

The Risk Team have mapped these components onto Spark's Agile organisation to integrate them into its roles, responsibilities, processes and activities.

The table on the next page shows the roles and responsibilities. Following these is important to ensure the intended outcomes and benefits of this policy are achieved.

## Where to get help

Use the Managing Risk kits, information on the webpage or contact the policy owner.

Further help and advice is available from the policy owner.

## Managing risk framework: Roles and Responsibilities
